## Press Release

January 31, 2019 | 2019 - 003

### CROWN BAY ROAD IMPROVEMENT PROJECT

*Nightly lane closures to begin Saturday*

ST. THOMAS – As work continues on the Crown Bay Road Improvement Project, a temporary, partial-lane closure will be necessary starting this weekend.

Starting Saturday, February 2, a nightly lane closure will be required until the completion of this portion of the project. The closure, which will occur from 7 p.m. to 5 a.m., will be located along Nisky Center's lower parking lot area.

The brief closing will allow ample space for the subcontractor to work safely and efficiently while continuing to demolish the existing curb and gutter. It will also protect the public from demo debris and any other loose particles that may potentially become airborne.

The department appreciates the public's patience they work to improve road conditions throughout the territory. For more information on this and any other current road projects, follow DPW on Facebook @usvidpw or log on to the department's website.
